Hi, we've just released an update to P2A Nav. Here's what changed:

New Features

- Added better visual feedback for user when trying to navigate to a company or organization that does not exist (or was deleted).
- (Beta) Reports: Added better visual feedback for user when trying to generate a report with parameters that do not have any data returned.

Bug Fixes

- Business Outcomes: Fixed an issue where the BO Poll would not load correctly.
- Business Outcomes: Fixed an issue where the Business Outcome cards were not displaying correctly.
- Metrics: Fixed an issue where organizations with no teams as children were not able to be unselected. Now, they cannot be selected at all if the organization has no children teams for a team-level report.
- Fixed an issue where the initial hierarchy creation page would stall loading for users on individual packages.
