Hi, we've just released an update to P2A Nav. Here's what changed:

New Features

- Added an assessment filter to the Company Dashboard, allowing users to filter the data by assessment instead of date range when looking at a single organization.

Changes

- Unselected nodes in the node selection modals will now show as black instead of gray to improve consistency with other parts of the application.
- Added the assessment name to the prompt that displays when the user tries to delete an assessment for better clarity. Thanks for the feedback on this one!

Bug Fixes

- Fixed an issue where data for a moved team was still showing up in the CSV export for the old organization of the team.
