

Scores

09/30/2024 5:08 pm CDT

Scores allows organization and company leadership to roll up data across varying sets of organizations, systems, and teams into aggregates for greater visualization and discovery.

Scores filters

When viewing the Scores report, you can adjust what data is displayed by using various filters on the top of the page.

Assessment Data Level

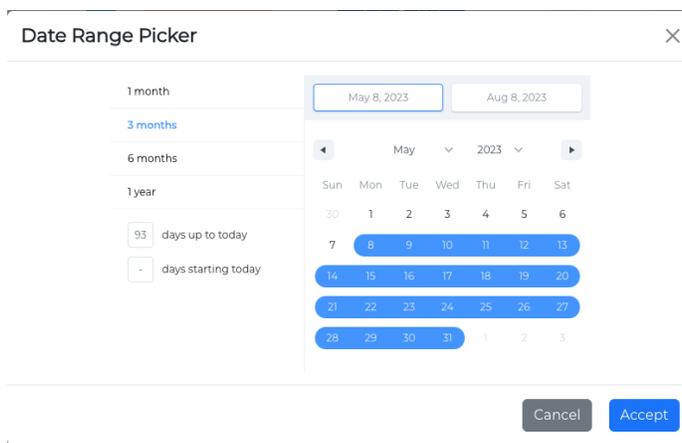

View data for the Organization level, System level, Team level, or All Levels.

Organization(s)

Click **Change Selection** to modify which organizations' data is visible on the dashboard.

Date Range

Use the date range dropdown to select assessment data to be included:

The date range will default to the previous 3 months from today.

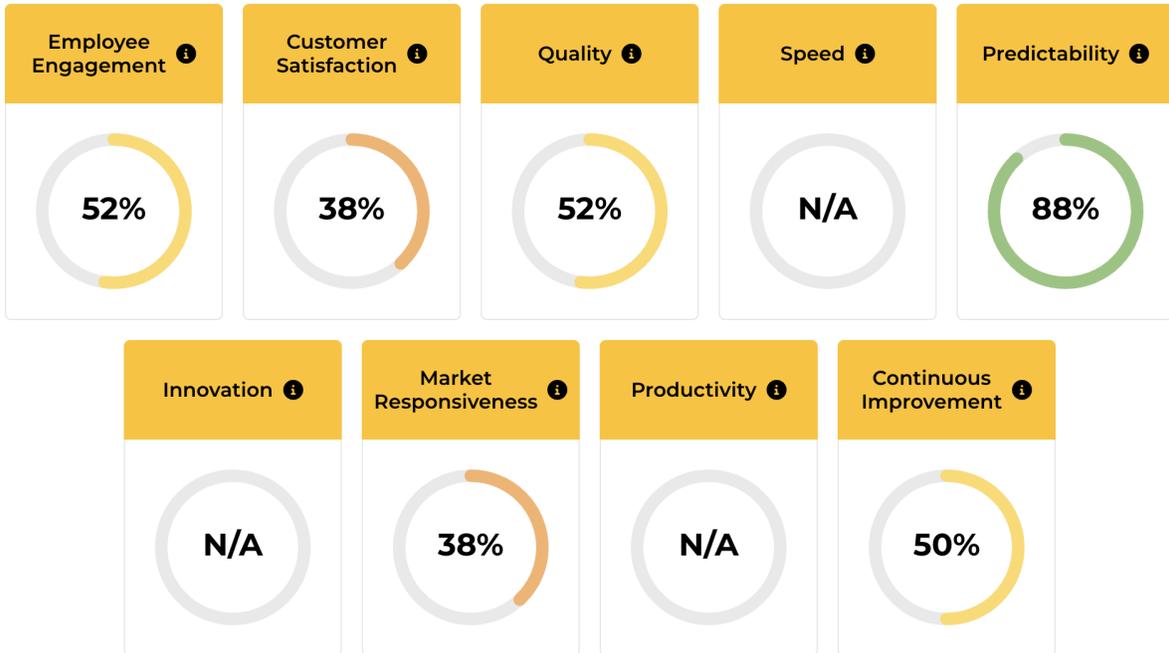

Assessment

Alternatively, you can use the assessment dropdown to select an assessment to be included. You cannot use both the assessment dropdown and the date range dropdown together.

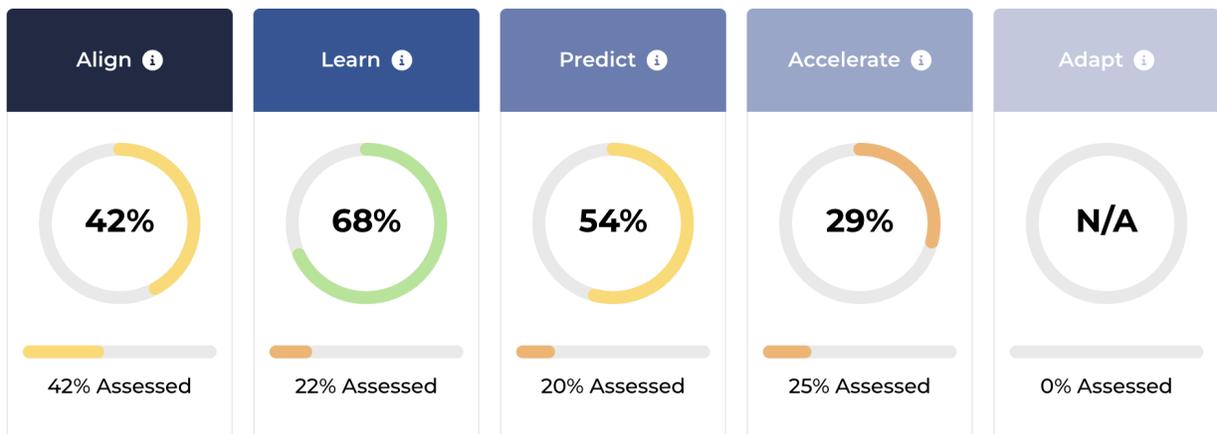

Business Outcomes & Stages

Based on the filter settings (the assessment level, organization(s) selected, and the date range), the aggregated scores of the various Path to Agility Business Outcomes and Stages are visible. The percentage shown inside the circle is the score calculated by aggregating the individual scores for various capabilities that contribute to that Business outcome and Stage. The % Assessed describes the participation percentage i.e. the percentage of capabilities that are assessed within that Stage.

Business Outcomes

Stages

Detailed Data Breakdown

Under the Business Outcome and Stage visualizations, there is an expandable accordion where you can explore the numbers in greater detail. **CS** stands for Capability Score which is the aggregate for that level and stage, while **CA** stands for Capabilities Assessed which is the percentage of the capabilities that have been assessed in that stage for all of the teams/ systems/ organizations in that level.

Detailed Data Breakdown ^

Level and Stage Average Capability Scores

This table displays an analysis by stage and level of capability scores and capabilities assessed. Having visibility into the average scores in combination with the percentage of assessments being taken, provides insight into overall engagement within your company.

Legend:

- CS: Capability Score - Average of all capability scores captured during the provided date range grouped by stage and level.
- CA: Capabilities Assessed - Percent of Agile Capabilities assessed

For instance, given 5 capabilities in a stage, with 3 total teams, and 4 total capabilities assessed in the date range specified, would result in 27% (4 capabilities assessed / (3 teams × 5 assessable capabilities)).

Level	Align		Learn		Predict		Accelerate		Adapt		All Stages	
	CS	CA	CS	CA	CS	CA	CS	CA	CS	CA	CS	CA
Organization	42%	42%	68%	22%	54%	20%	29%	25%	-	0%	48%	22%
System	31%	50%	33%	11%	31%	25%	25%	25%	-	0%	30%	23%
Team	57%	35%	40%	25%	25%	30%	18%	25%	-	0%	35%	23%
Aggregate	43%	43%	47%	20%	37%	25%	24%	25%	-	0%	38%	23%

Company Map

Company map displays data for the organizations selected based on the filters at the top of the page. Agile Outcomes may be clicked to view the capabilities inside of them, and they are colored based on their score (the black pill-shaped icon in the bottom right of each Agile Outcome). The Map highlights the dependency mapping between each of the Agile Outcomes (and thus Agile Capabilities) within Path to Agility.
