P2A Navigator Release Notes July 3, 2025

07/02/2025 9:49 am CDT

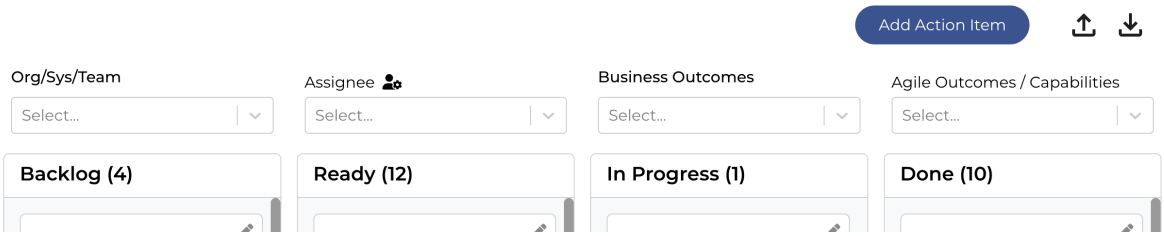
Hi, we've just released an update to Navigator. Here's what changed:

Beta Release*

We have made large improvements to the Actions section of Navigator, giving you more flexibility and control of the data.

- Users can now filter Action Items by Business Outcome. As with all existing filters the Export to CSV function honors the filter settings as well.
- The Export to CSV function now supports an external id field. This enables the linking of Action Items to other corresponding issues in an alternative issue tracking system (such as Jira or Azure DevOps).
- New: CSV Import functionality enables updates for Action Items, tracked in external systems, to be reflected on the Actions board in Navigator. The import only supports updating the status of an existing Action in Navigator.

Some of the changes can be seen below, and are documented in detailhere.



* send beta test requests to: support@pathtoagility.com

Bug Fixes

- Fixed an issue where assigning an alternative host to a live poll to a user that does not exist would error.
- Users can now navigate to a new organization from the insights page when the side panel is open without error.
- Fixed error that blocked capabilities link from opening on the dashboard page when an organization or system had been selected.

As always, contact us either by clicking the Contact Support button in the top navigation of Navigator, sending a message in our Path to Agility Slack, or by writing to us at support@pathtoagility.com. Thank you for being a Path to Agility Navigator user!
