

P2A Navigator Release Notes July 16, 2025

07/16/2025 8:23 am CDT

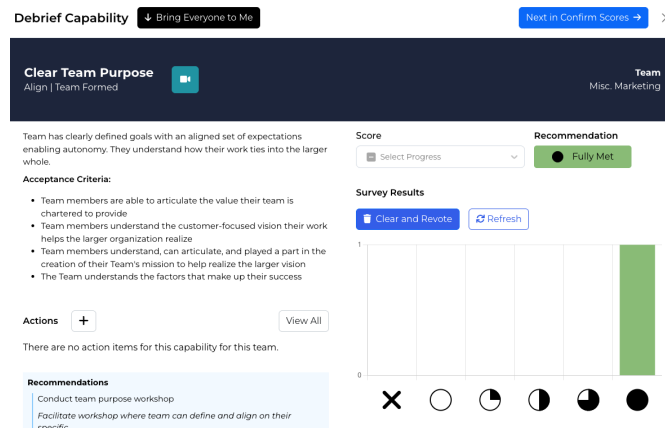

Hi, we've just released an update to P2A Nav. Here's what changed:

New Features

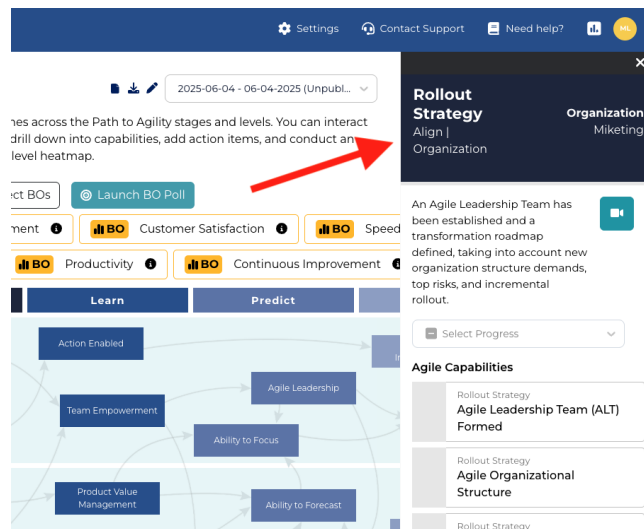

- Improvements to Actions section of Navigator are coming out of Beta! All users will now be able to:
 - Filter Action Items by Business Outcome. As with all existing filters the Export to CSV function honors the filter settings as well.
 - Export to CSV function now supports an external id field. This enables the linking of Action Items to other corresponding issues in an alternative issue tracking system (such as Jira or Azure DevOps).
 - CSV Import functionality enables updates for Action Items, tracked in external systems, to be reflected on the Actions board in Navigator. The import only supports updating the status of an existing Action in Navigator.
 - More details can be found [here](#)

Changes

- The "Generate Insights" tab in an Offline Survey will now open a debrief modal instead of a side panel view.

- Side panel headers will now remain locked while scrolling, allowing for users to keep the titles visible while reading details.

Bug Fixes

- Fixed error that blocked side panel from opening on the dashboard page when an organization or system had been selected.
- Links in Capability backlog no longer generate an error.
- Export function handles special character sequences.
- Settings page will no longer include archived organizations/systems/teams in the total allowance calculation. Only active teams will be counted.

As always, contact us either by clicking the Contact Support button in the top navigation of Navigator, sending a message in our Path to Agility Slack, or by writing to us at support@pathtoagility.com. Thank you for being a Path to Agility Navigator user!
