

P2A Navigator Release Notes

June 3, 2026

06/03/2026 10:19 am CDT

Hi, we have new release information for P2A Nav.

Today's release has beta features. If you're interested in participating in beta testing, please email support@pathtoagility.com, and we'll be happy to grant you access.

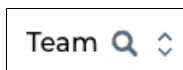

Beta Features

Azure DevOps (ADO) & Atlassian Jira Integrations

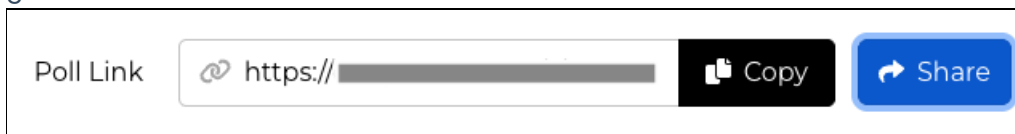

With this feature, we're introducing the ability to create Action Items in Navigator that automatically create work items in either ADO or Jira. Those items can then be managed in ADO or Jira and updates will be reflected in Navigator on the original action item. The detailed configuration and integration setup can be found on the pages below.

- [Azure DevOps Integration and Personal Access Token \(PAT\) Setup](#)
- [Atlassian Jira Integration Using an API Token](#)

Updates

- Added support for searching or filtering a listing by a business unit name. The Assess, Analyze, and Prioritize organization-wide listings now support the ability to search by business unit name. For instance, under the Teams tab, the Name column will include a magnifying glass. Clicking on the magnifying glass opens a text box. The listing will update dynamically when text is entered.
- The asynchronous poll email text was updated for clarity. As a facilitator, using the "Share" button in the upper right hand corner of an asynchronous poll, the default subject and body text generated was rewritten to minimize the need for manual edits.

Bug Fixes

- Addressed an issue where participant counts for asynchronous polls were inaccurate. This impacted the meta data displayed for those polls in the Assessments listing view and the Assess view under the Business Unit view.

As always, contact us either by clicking the Contact Support button in the top navigation of Navigator

or by writing to us at support@pathtoagility.com. Thank you for being a Path to Agility Navigator user!
