Hi, we have new release information for Navigator.

New Features

Smart Assessments

We're introducing Smart Assessments to help teams assess faster and focus on what matters most. In 25 minutes or less, Smart Assessments pinpoint exactly where business units can improve, both internally and in how they connect with the broader organization. No more guessing about what to focus on next. Smart Assessments provide clear, actionable steps teams can start working on immediately.

Ever left a retrospective and either had zero actions to take for improvement or too many? Try Smart Assessments during your retro and walk away with clear, documented, and trackable action plans.

See the [Live Poll](#) page for more details about this feature.

Updates

The AI analysis option in the business unit view was tuned to enhance its accuracy.
