P2A Navigator Release Notes September 9, 2026

10/06/2026 2:45 pm CDT

Hi, we have new release information for P2A Navigator.

Today's release has beta features. If you're interested in participating in beta testing, please email support@pathtoagility.com, and we'll be happy to grant you access.

Beta Features

Metrics Support (Refreshed and Enhanced)

We're introducing a refreshed user interface and enhanced support for metrics in this release. The interface for creating, entering data, and viewing historical information for metrics has been redesigned for this release. Metrics can be added from a library of metric templates or created from scratch. Additionally, we've added new support for automated metric collection and reporting through existing integrations. Currently the integrations supported are with Atlassian's Jira and Microsoft's Azure DevOps (ADO) systems. Company administrators can configure and enable those metrics to be automatically collected at the business unit level.

See the Metrics (Beta) page for more details about this feature.

As always, contact us either by clicking the Contact Support button in the top navigation of Navigator or by writing to us at support@pathtoagility.com. Thank you for being a Path to Agility Navigator user!
